North Kona Water Restriction

This is a Department of Water Supply Water Restriction update for Wednesday, July 5, at 4:00 p.m.

The Department's Keahuolū Deepwell, which was out of service since last Thursday causing the emergency restriction and limiting water usage to health and safety needs only, has now been repaired and is operational.

Due to your help, water service was maintained to all users during this emergency.

Because four (4) wells are still being repaired, you are reminded that the mandatory water restriction is still in effect for the North Kona area.

This means everyone must continue to reduce their normal usage by **25 percent**.

DWS will continue to monitor water use.

For more information including schedule of well repairs, and ways to reduce water usage, please visit our website at www.hawaiidws.org or call the Department of Water Supply. During normal business hours – 961-8060. After-hours and emergencies – 961-8790.

Mahalo for your cooperation and understanding.
